PROPOSED AMENDMENT TO CLAIM 1 of 10/668,730

1. (Currently amended) A digital display device comprising:

- a communication interface adapted to communicate with an external archival storage device;
- a content source adapted to acquire content in an acquisition resolution ~~form~~ from an external device;
- a presentation system for presenting content at a presentation resolution that is lower than the acquisition resolution; in a form that is different from the acquisition form;
- a memory for storing content;
- a controller adapted to receive acquired content from the content source, to form presentation content that corresponds to the acquired content said presentation content and that is adapted to have the second resolution for presentation using the presentation system and to cause the acquired content and the corresponding presentation content to be stored in the memory; and

wherein the controller is further adapted to cause the communication interface to transfer acquired content to the external archival storage device and to delete the transferred acquired content from the memory while retaining the presentation content in the memory for later presentation.
